

Akes 25
Walkaround

Akes 25 | Walkaround

Akes 25 Walkaround, a cabin fish boat born thanks to cooperation with Akedesign, that combines seaworthiness and overall performances with a comfortable deck and cabin. This boat design gives a bomb-proof strength: thickness of 4 and 6 mm marine grade aluminum 5083 H111 and a continuous structural grid make it extremely stiff and almost strong to be able to withstand stress beyond all limits required by a common user and proper of extremely demanding professional use.

The hull is the latest evolution of hull shapes already tested successfully on other Akedesign boats, known for their seaworthiness: plane with very low speed, smoothness, soft impact in rough seas and dry ride, all these features joined with a low weight make the Akes 25 able to give outstanding performance with only a single engine of 200hp. Light weight and smoothness, the objectives of the boat design, are also reflected in consumption that are significantly lower than those of a similar classic fiberglass boats. Akes 25 reaches the mile per liter at cruising speed.

A stable hull both transversely and longitudinally, and dry, allows to have a satisfying ride in all weather conditions. But security is also passive: although it is very difficult to scratch the thick hull of Akes 25, as the Aluminum is the best material in the graze resistance, Akes 25 Walkaround is compartmentalized in watertight sectors and there lies the inside buoyancy polystyrene cut and pasted hot, to make the boat completely unsinkable.

In addition to seaworthiness and strength worthy of the name, the design of the boat has been developed with an emphasis on comfort and ergonomics of the deck.

Nothing cramped, no wasted area: two large stern platforms make it pleasant to spend the moments of sun lounging comfortably in the stern, a side passage of more than 60 cm in width makes the immediate access to the cockpit, the dining area is very comfortable thanks to the sofas in the middle of which finds place a table of generous proportions that can make even extension to create aft sundeck, the stern seat on one side has a live bait tank and on the other side a rail protection for maximum safety.

The bolster - central driving seat, is also a storage locker that can hold the refrigerator or other equipment and make also as backrest for pilot and co-pilot. The console has the ergonomically designed area for instrument to read them immediately.

The access to the bow is by two comfortable steps and in the bow deck there is also a sundress area with handles on the side of safety. The bow ends with anchor space in which can be placed the electric winch for anchor and chain. Another solution refined and perfected is the t-top "G-top" made with continuous tube curved on which is welded a metal sheet that is, apart the roof, the basis for each type of instrument and lights.

The access in the cabin is through a wide access door (60 cm wide), inside there is the main bed with dimensions 195x180 cm, suitable for spending the night on board.

Under the bed there is also a space enough big to place furnishings, luggage, and others; Astern of the bed there is also the separate wc toilet.

The cabin is well lighted by day due to big lewmar windows, and by night thanks to led illumination lights.

Colours of the interior fabrics and upholstery are completely customizable.

The hull is fully welded with double pulsed arc welder "weco power pulse", with continuous alloy thread ALM G 5.

Accessories are fixed and bolted with inox screws 316 A 4 (Uni etc etc etc), fully enclosed with teflon topping or fixotropic sealant 1k , to complese insulate aluminum from steel.

Akes 25 Walkaround Technical Specifications

Material: marine grade alloy 5083 H111, 4, 6 and 15 mm thickness
Length: 7.5 M
Length over all F.T. : 8.1 M
Beam: 2.55 M (trailerable)
Dry weight: 1200 KG
Load: 8 persons
Engine: 200 - 350 HP single outboard
Max power: 350 HP (single) 2x175 HP (twin engine transom)
Performances: up to 52 knots
Fuel tank: plastic 300 L
Water tank: 100 L
Fishrods: 6/8
Livewell: 50 L
Ce cat. B/C

OPTIONAL ACCESSORIES

Ladder
Complete upholstery customizable
Windshield wiper
Cooler/freezer
Table
Anchor electric windlass
Wc
Water-repellent inside cabin upholstery, various colours
Electronics accessories (gps, echo, vhf)
Customizable wrapping
Cooker
Battery charger and inverter
Antenna predisposition
Lights
Shower
