Fishmaster 350

Fishmaster 350 / 350-2

Boat for rowing or electric powered engine, o or little outboard (2/4 hp), suitable for protected waters, lakes, creeks, calm sea areas.

The hull bottom is flat to ensure the max stability and the well shaped bow improves the speed: inside seats are filled of closed cell foam to make the hull unsinkable.

The seats are well placed to row comfortably and a rounded shape pipe on gunwhale make the trasport safe.

The Fishmaster 350 is a great boat to be carried and launched in protected waters and enjoy a day in "little navigation".

Entirely welded, without rivets.

Fishmaster 350 Main Specs
